Aluminium Composite Panels

Innovative Cladding. Enduring Quality.

Our Aluminium Composite Panels (ACP) are the perfect fusion of innovation, style, and strength—designed to meet the ever-evolving needs of modern architecture. Made from two thin aluminium sheets bonded to a non-aluminium core, our ACPs offer a lightweight yet highly durable solution for exterior façades, interior applications, and signage.

What are Aluminium Composite Panels?

The Aluminium Composite Panel consists of Aluminium as the top and bottom layer, while the composite panel is sandwiched between them together. The aluminium used in the manufacturing of ACP panels is pre-treated with tough and stable Kynar 500 PVDF resin, which keeps the shine of the panel intact for years. The overall thickness of these panels ranges from 3-6mm, which can be used in interior and exterior applications for industrial, residential and commercial purposes. Some of the popular ACP design series for facades include Mirage Fluted Series, Alzinc, Tarnish Metallum, Lustre, Desert, Classic Spakle, Elemento, Wooden, Solid & Metallic, etc.

Characteristics

- 10 to 30 years of warranty
- 90-degree bendability
- Available in LDPE core, FR core, and mineral-filled core

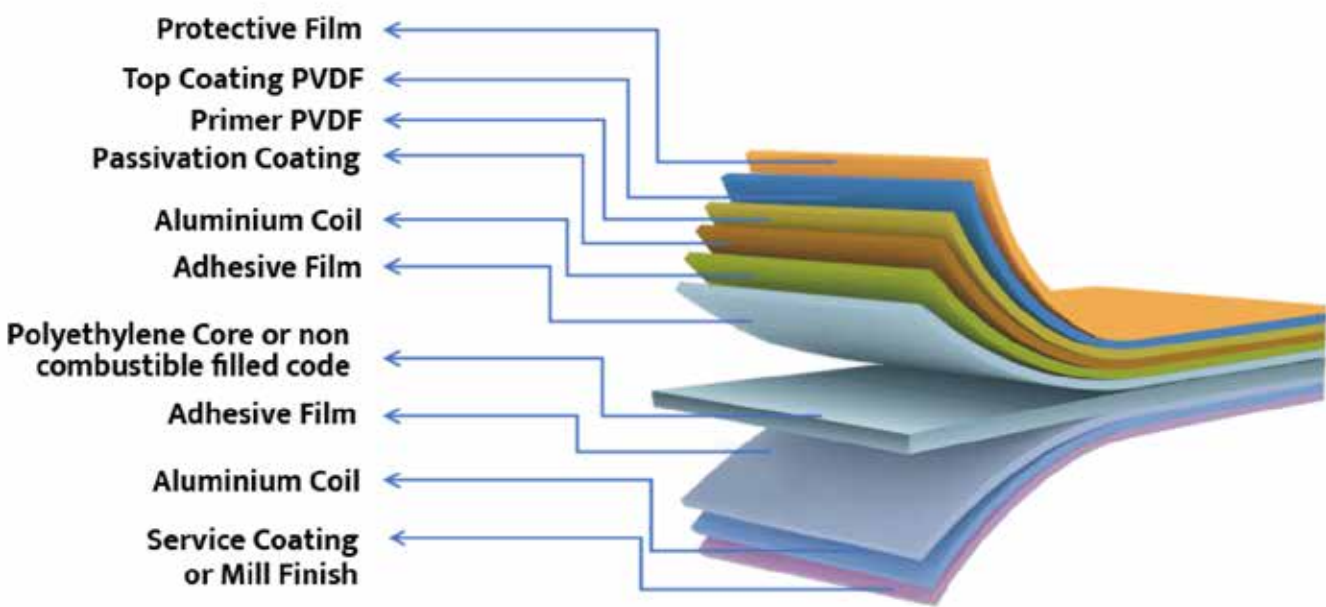

Combining Aesthetic Excellence with Unmatched Performance

With outstanding insulation, weather resistance, and a wide range of colours and finishes, Viva ACPs are the go-to choice for both aesthetic impact and functional performance.

Versatile. Stylish. Built to Perform.

VIVA’s premium aluminium and metal composite panels offer a versatile, durable, and visually striking solution for interior and exterior cladding. Available in a variety of sheet sizes, the most commonly specified options are 3mm and 4mm thicknesses—ideal for architectural façades, signage, and high-traffic commercial applications. With a wide selection of colours, textures, and finishes, Viva lets architects and designers bring their creative visions to life with striking façades, feature walls, and more.

Our ACP panels are designed for performance. The lightweight core provides excellent thermal and sound insulation, while the strong aluminium layers offer impact resistance and a smooth, even surface. This makes Viva ACPs perfect for both indoor and outdoor use—on building exteriors, interior walls, furniture, signage, and other custom applications.

VIVA transforms your cladding vision into reality. As one of India’s leading manufacturers and suppliers of premium Aluminium Composite Panels, they have built a reputation for excellence, trust, and reliability since our humble beginnings in 2003 in Mumbai, Maharashtra.

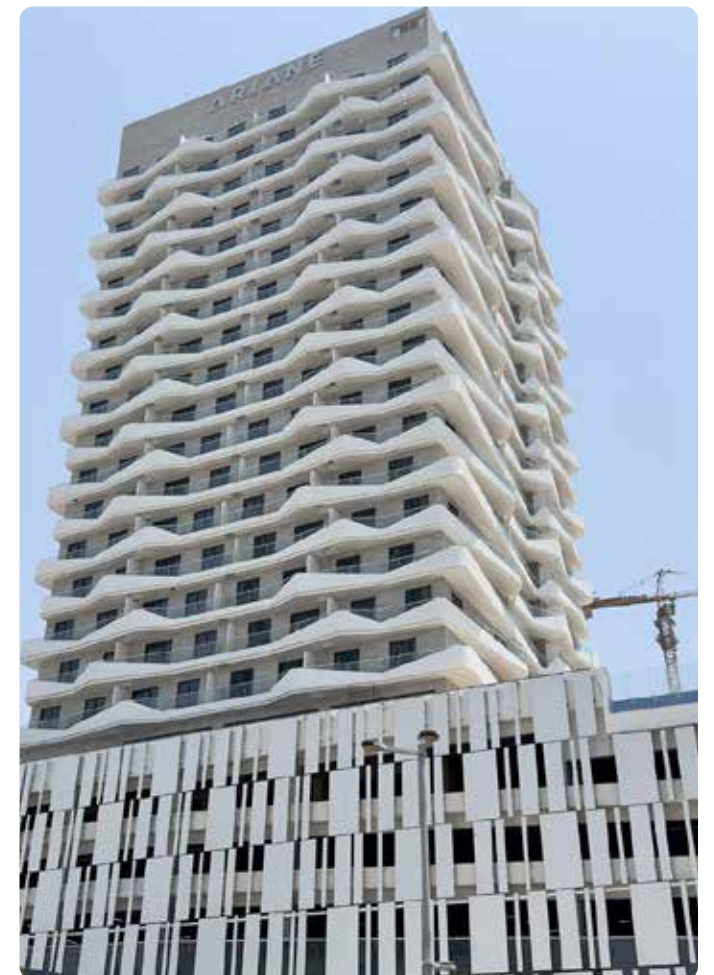

Certified Sustainability. Guaranteed Performance. Our product is fully sustainable, supported by official certifications and comprehensive technical data sheets. Depending on the colour chosen, we offer a warranty of 10 to 15 years—or even longer—ensuring lasting quality and peace of mind.

Key Advantages:

- Fire-rated options for enhanced safety in both residential and commercial builds
- Excellent flatness, rigidity, and weather resistance
- Wide selection of colours, finishes, and textures including metallics, solids, and woodgrains

Important Note:

Always confirm full specification details prior to ordering, including the panel thickness, core type (FR, PE, or other), aluminium skin gauge, substrate, and final colour selection to ensure suitability for your project.

CONTACT US

Please note that while we do keep stock for corporate roll-outs, our orders are typically project-based, and standard lead times apply for bringing in material. Once we receive the required quantities and measurements, we'll request pricing from the manufacturer. We will then engage three installers to provide supply-and-fit quotations, allowing us to present a comprehensive supply and installation costing.

If you would like to view an actual sample, we will gladly order one for you.
