Original inspirational.

Architecture is more than purpose. It is language, feeling, expression – and at the same time restricted to the realm of what is possible. With a variety of innovative designs, FunderMax opens up whole new worlds of architectural freedom and paves the way from the first idea to its final realization. The original delivers on its promise.

This brochure shows you what architects have created so far with FunderMax: multifaceted, authentic and colorful. Let yourself be inspired to also give your buildings character!

Max Compact Exterior F-Quality

Max Compact Exterior is a high-quality construction product which is used especially for long-lasting balcony and facade claddings. Max Compact Exterior panels are duromer highpressure laminates (HPL) in accordance with EN 438-6 Type EDF with extremely effective weather protection. This weather protection consists of double-hardened acrylic poly- urethane resins. They are produced in lamination presses under great pressure and at high temperatures. Max Compact Exterior panels are, of course, labelled with the CE-Mark necessary for their use in building applications.

Surfaces

NT

NH (Hexa)/NT (format 4100 x 1854 mm only)

NG* (Gloss)/NG (Gloss) (format 4100 x 1300 mm only)

NY (SKY)/NT (format 4100 x 1300 mm only, thicknesses 6 mm and 8 mm, limited decor range)

Formats (production sizes)

9'2 1/4" x 4' 3" = 39.25sf (2800 x 1300 mm)

13' 5 1/8" x 4' 3" = 57.44 sf (4100 x 1300 mm)

9'2 1/4" x 6' 5/8" = 55.79 sf (2800 x 1854 mm)

13' 5 1/8" x 6' 5/8" = 81.65 sf (4100 x 1854 mm)

To get a perfect design of the facade cladding with NG surface it is recommended to glue the panels on an aluminium-subconstruction. Subconstruction like wood do not have the right properties to avoid a wavy appearance of the cladding.

12.0 - 15.9 mm	± 0.6 mm
16.0 - 20.0 mm	± 0.7 mm

Panels with sanded-reverse side:

For symmetrically structures sandwich elements.

Thicknesses	Tolerances (EN 438-6, 5.3)
2.0 - 2.9 mm	± 0.2 mm
3.0 - 4.0 mm	± 0.3 mm

In order to be able to design the inner sides of balconies with a uniformly light look, it is also possible to produce Max Compact Exterior panels with a white (rear) side using decor 0890 NT – Balcony white. As a result of the differing decor structure, the fastening spacings given in our Technical Information brochures should be reduced by about 15 %.

Formats (production sizes)

Tolerances +10 - 0 mm (EN 438-6, 5.3)

Panel formats are production formats. If exact dimensions and angles are necessary, we recommend an all-sided blank. Depending on the method of trimming, net size is reduced by approx. 10 mm.
